Niceville, FL- Put this into your oven to bake...

7th grade students (Michael Warner, Kirsten Haugan, Bailey Tolbert, Craig Zapata, Trace Antonacci, and Sam Williams) in Ms. Rachel Donahue's Science class at Rocky Bayou Christian School recently studied genetic codes by making "Spudoodles". Each "potato head" represents the imaginary, yet well-defined inherited set of chromosomes of its parents. From the tips of their toes (and including their "souls"), to their "eyes", the students gained insight into their God's creative genius!

Rocky Bayou Christian School, a K-3 through 12th grade Christian school, does not discriminate on the basis of **race, color or ethnicity** in the admissions of students per USC 2000d. RBCS began its ministry with a twenty-two member student body in 1973. The present enrollment is over 600 students, which includes students bused from as far away as DeFuniak Springs and Navarre. The school also offers a special education ministry and has developed Christ-centered early childhood curriculum materials which are being used nation wide by Christian day schools and homeschoolers.
